

About ESP®

For more than 20 years ESP® has been developing and supplying security related products to the UK electrical industry. As a leading safety and security product specialist, the company offers a comprehensive range of electronic security and fire detection solutions to meet the requirements of installers and contractors. The range includes CCTV, Access Control, Video Door Entry, a growing collection of conventional, addressable and 2 Wire Fire Protection products, Ducer Emergency Lighting, Essentials, and the new addition of Sangamo Time Switches and Heating Controls.

Central Location - England

Based in Worcestershire in the Midlands at our purpose built Head Office and Distribution Centre, we are ideally located to design, develop, manufacture and distribute our ever-expanding product range worldwide.

Delivering New Products

Our New Product Development Team are constantly tracking market trends, approval standards and providing customised products according to unique specification. This ensures we continue to increase our product range to meet the ever-changing needs of our customers.

A Scolmore® Group Company

ESP® has been part of the Scolmore® Group of companies since 2011, and whilst the company operates independently, ESP® benefits from the expertise, knowledge and support of the Scolmore® Group and continues to create strong growth within its product categories.

Scolmore® has been a leading UK manufacturer of electrical accessories and lighting products since 1989 and has earned a reputation worldwide for high quality products, innovative solutions and exemplary customer service. Key to the continued success of the group is the commitment to developing new products which incorporate the very latest in technological advancements, and provide contractors and installers with cost-efficient, easy to install solutions that help them remain highly competitive.

Training Days

As part of our commitment to our customers, and in an effort to help them develop and grow their business, we invite contractors and wholesalers to our specially designed training days which take place regularly at our head office premises. Our training programmes are aimed at those customers who would like to add fire and security equipment to their product portfolio but feel they do not have the knowledge to do this with confidence. Most aspects of security are covered including CCTV, Access Control, Essentials, Sangamo, with a separate training day dedicated entirely to Fire Protection products.

CCTV

A practical range of security and observation solutions including the new super high definition HDview professional range.

Emergency Lighting

Designed and manufactured to meet the latest standards and regulations whilst retaining a contemporary design.

Access Control

The new Aperta range is a simplified and easy to install video door entry system for both single and multi way applications.

Essentials

The new Essentials product group is just that - ESSENTIAL.
Now featuring the new Disabled Toilet Alarm.

THE ESSENTIAL RANGE

The new Essentials product group is just that - ESSENTIAL.
Now featuring the new Disabled Toilet Alarm.

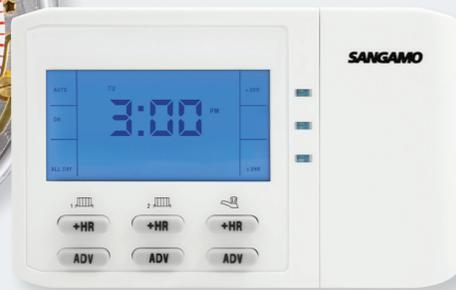

VanCam® | CanCam^{HD} | GuardCam® | NightHawk^{LED}

TIME SWITCHES & HEATING CONTROLS

Sangamo offer a wide range of time switches and heating controls for domestic, commercial and industrial use. Our reputation for quality and reliability is unrivalled.

SANGAMO

ESP behind 'Pig Brother' initiative

In a rather unusual application, one of ESP's high definition CCTV systems has been installed to provide security for a community pig rearing scheme, set up in Little Beckford in Worcestershire, and the subject of a recent BBC Countryfile episode.

Qualified electrician, Paul Hopkins, set up the pig rearing scheme after he took over a four acre farm when his father retired and was persuaded by a friend to buy some piglets. The Little Beckford Pig Association was established - a community farming project where members 'buy' a pig and help rear it, until it's ready to be slaughtered and then the owners take home their investment in the form of meat, which comes from pigs they know to have been responsibly reared outdoors.

An electrician for more than 25 years and running his own electrical company, P&H Services, for the last six years, Paul had no previous experience of CCTV installation until he came across the ESP system. He installed ESP's DigiviewHD 8 channel true HD CCTV System, with the cameras positioned to overlook the areas where the pigs are kept. With the owners keen to be as involved as possible, they are able to log in remotely from their homes and keep an eye on their pigs at all times of the day or night.

Comments Paul: 'Having no knowledge of CCTV installation, I was very impressed with how easy to install and set up the ESP system was. I love the plug and play aspect and since that first installation we have now gone on to install around eight more systems in other farms in the surrounding area.'

The DigiviewHD 8 channel CCTV system installed by Paul delivers superior display and recording clarity and a high-capacity hard drive with 1TB, 2TB or 4TB options available. It offers remote monitoring via wired or Wi-Fi connection and mobile monitoring with Android or iPhone App. Paul has recently upgraded the system to the 16-channel version.

ESP has security all covered at holiday park

Founded in 1951, Priory Hill Holiday Park is a popular, family-run holiday park located in Leysdown on the Isle of Sheppey less than 50 miles from London. When it came to installing a new fire alarm system and CCTV system, local electrical wholesalers, Regent Electrical Distributors in Sittingbourne, had no hesitation in recommending products from the ESP range.

Two of the company's HDView 16 Channel Full HD CCTV systems have been installed to offer protection across the whole site. A number of PTZ cameras have been included. They are equipped with a motorized mechanism that facilitates remote control of the camera's lens, allowing large areas to be covered with a single camera. This mechanism offers a full pan, tilt and zoom operation, whilst enabling a 360 degree endless pan rotation function, which is ideal to cover the expanse of grounds that the site occupies.

The HDView system provides superior quality live images and recorded footage, which is essential for any CCTV system installation. It is networkable for remote viewing from a PC or Smartphone or tablet - a great feature which allows the owners of the holiday park to keep round the clock surveillance on the premises.

ESP's MAGfire 4-Zone Conventional Fire Alarm System has been installed to protect a new convenience store that now operates on part of the site. The system comprises a 4-zone fire panel, 5 x optical smoke detectors complete with bases, 1 x fixed temperature heat detector complete with base, 2 x resettable call points, 2 x banshee sounders and 1 x 12v 7.0ah SLA battery.

Kevin Camber, branch manager of Regent Electrical, responsible for specifying and supplying the products commented: 'We have been working with the Scolmore Group for around five years and have a great relationship with them. They are a great supplier to deal with in all aspects - from the extensive range of high quality, reliable products across both Scolmore and ESP, to the sales and marketing support. Both the CCTV and Fire Alarm systems have ease of installation and operation as a major benefit.'

New restaurant and bar gets the Scolmore Group makeover

Products from Scolmore and ESP are providing the emergency lighting, security, wiring accessories and smart control solutions at a new, 54-seat restaurant and bar which has recently opened its doors in Sittingbourne, Kent.

ESP has the security covered with its HDView 1080p CCTV system, which allows the owners to keep a remote eye on their premises with the tailor-made HDView app. The company's MagFire conventional fire alarm system has also been installed, along with products from the Duceri emergency lighting range.

Wiring accessories from Scolmore's Mode range were chosen for their stylish and contemporary smooth profile and flexibility, while the Click Flow connectors were used for simple connectivity and control of the lighting circuit.

Scolmore's Click Smart Box and App is providing the owners with the ability to control the lighting and create different moods and scenes in the restaurant depending on the time of day, via the Click Smart App which the owner has downloaded onto his iPad. Comprising three basic components, Click Smart Box, RF Receivers and a Smart Phone, the system is a high end, professional one which is very competitively priced and has been designed with installers in mind. It can add functionality to already installed Click Smart receivers, or it can be installed from scratch on a brand new build and it enables automation via phone for the whole family or team.

Darren Lingham from Innovative Engineering Solutions in Gillingham was responsible for the installation of the Scolmore and ESP products and commented: 'I have used ESP and Scolmore products for a number of years across a range of projects and have always been impressed with the quality. I hadn't installed a Click Smart system before and was really impressed with how intuitive it was and the great results that can be achieved without taking up too much time or disruption.'

'At ESP® the customer is at the heart of everything we do. For more than 20 years we have been developing our business from the inside out, to ensure that our team of dedicated employees have the skills, resources and support to build strong and rewarding relationships with our customers. Continuous investment in innovative new product development, excellent customer service and the ability to stay ahead in a fast-moving, technology-driven sector means that at ESP® we are well placed to help drive growth and success for our customers within the expanding security market.'

Neil Baldwin
Managing Director

Stock

Our extensive range of products which covers six different categories are all held at our distribution centre in the West Midlands. This means we are able to offer 97% availability on stock at any given time.

Warehouse / Service

Our centrally located warehouse and distribution centre allows us to guarantee next day delivery on all our product ranges.

Product Development

ESP® products are designed with our customer / the installer very much in mind. Our purpose built facilities and dedicated product development team, based in the UK allow us the flexibility to design and develop these products based on customer feedback and market research, ensuring we are producing a relevant, reliable and quality range of products.

Sales Structure

The external sales team is being continually developed to enable ESP® to meet the ever-changing needs of the market. This development now sees the sales force able to offer dedicated contacts for both distributors and contractors at local and national account level and allows us to maintain a focussed approach in line with our business development plans.

Distributor Network

ESP® has over 2000 trading accounts providing a comprehensive network of wholesale outlets covering the whole of the UK. These are a combination of Independent Wholesalers, National Wholesale Groups and Buying Consortiums. The company sales strategy is to ensure that all ESP® products are available local to the requirements of the installer and specifier.

In-House Studio

All marketing support including product literature and point of sale material is designed by our dedicated in-house design studio. This facility enables us to offer bespoke marketing support to our customers and the availability of an on-line Marketing Hub and dedicated Marketing Support brochure has provided Stockists of ESP® Products with a range of tools to enhance their own marketing activities.

Sales Office

Located alongside our distribution facility this busy sales office provides a central point of contact for all customer service requirements. The professionalism skills and knowledge of our internal sales team enables us to provide the high standard of service that we know our customers expect. Our on-line ordering facility is also managed within this office.

Supporting our Industry

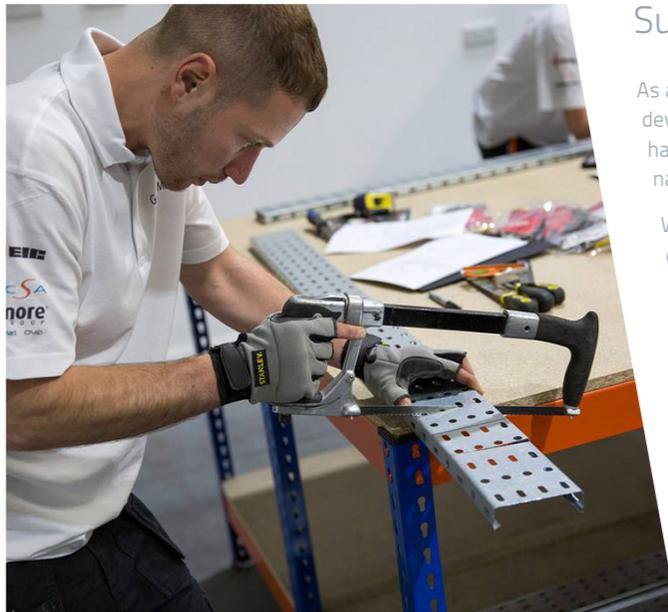

ESP® is committed to supporting the electrical industry and on a regular basis is actively involved in a number of initiatives with leading industry bodies ELEX, NICEIC, ECA, EDA, NAPIT & SELECT.

Supporting Apprentices

As a company we understand the importance of investing to develop new talent for the future of the industry. Our commitment has led to collaboration with NICEIC and ELECSA to support the national Electrical Apprentice of the Year competition.

We are also committed to World Skills in which we support and encourage future generations of electricians.

MARKETING hub

Marketing Hub | www.espuk.com/marketing/

The Marketing Hub is the latest update to the ESP® website giving customers the opportunity to enhance their own Marketing facilities with very little effort or cost. A selection of templates is available featuring many of our popular products. These templates can be customised with our stockists' details to provide maximum impact and optimise local sales opportunities.

Print ready editable promotional leaflets

Promotional leaflets available for you to download, with editable sections so you can add your company's details.

Full product image library

Download all of our product images; each one saved by product code and at a perfect resolution for your website.

All the latest catalogues

Download all of our latest catalogues as pdfs, all stored in one easy to find location. Keep checking back when new products are launched for new information.

Print Ready, Editable Promotional Leaflets

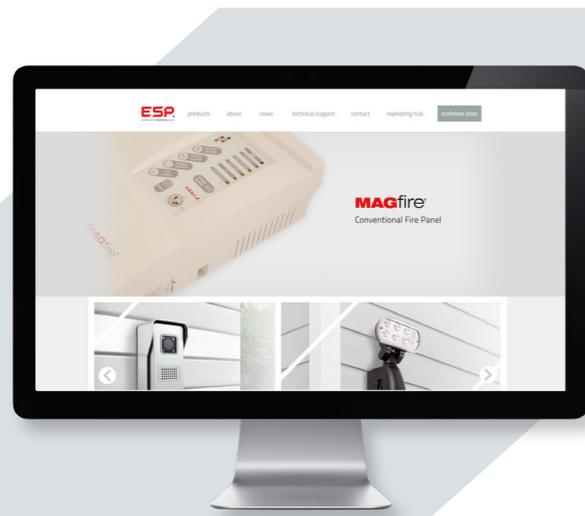

Choose your artwork and click download... Simple !!

Promotional leaflets available for your download, with editable sections so you can add your companies details.

ESP® Website | espuk.com

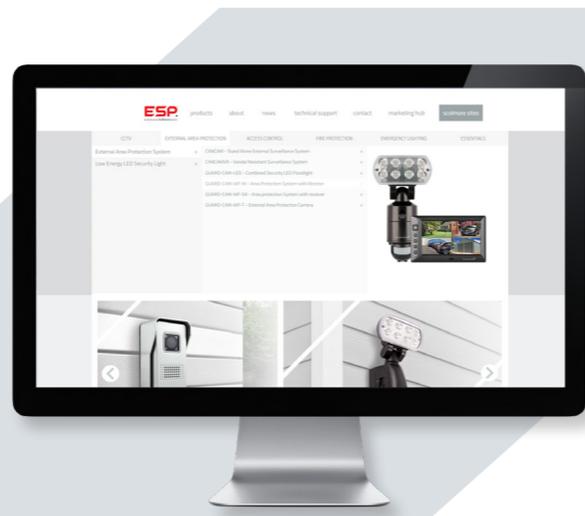

This comprehensive website provides customers with access to detailed product information for the company's extensive range of security products, which includes CCTV, access control, fire protection, emergency lighting, essentials, time switches and heating controls.

Stockists can also take advantage of a comprehensive product image library, plus a range of literature covering every product category - all available to download at the click of a button. Visitors can keep updated of all the latest new products and company developments via regular updates on the news section.

Regular news & product updates

With regular updates on new products and details of developments within our business, the site is a great source of information.

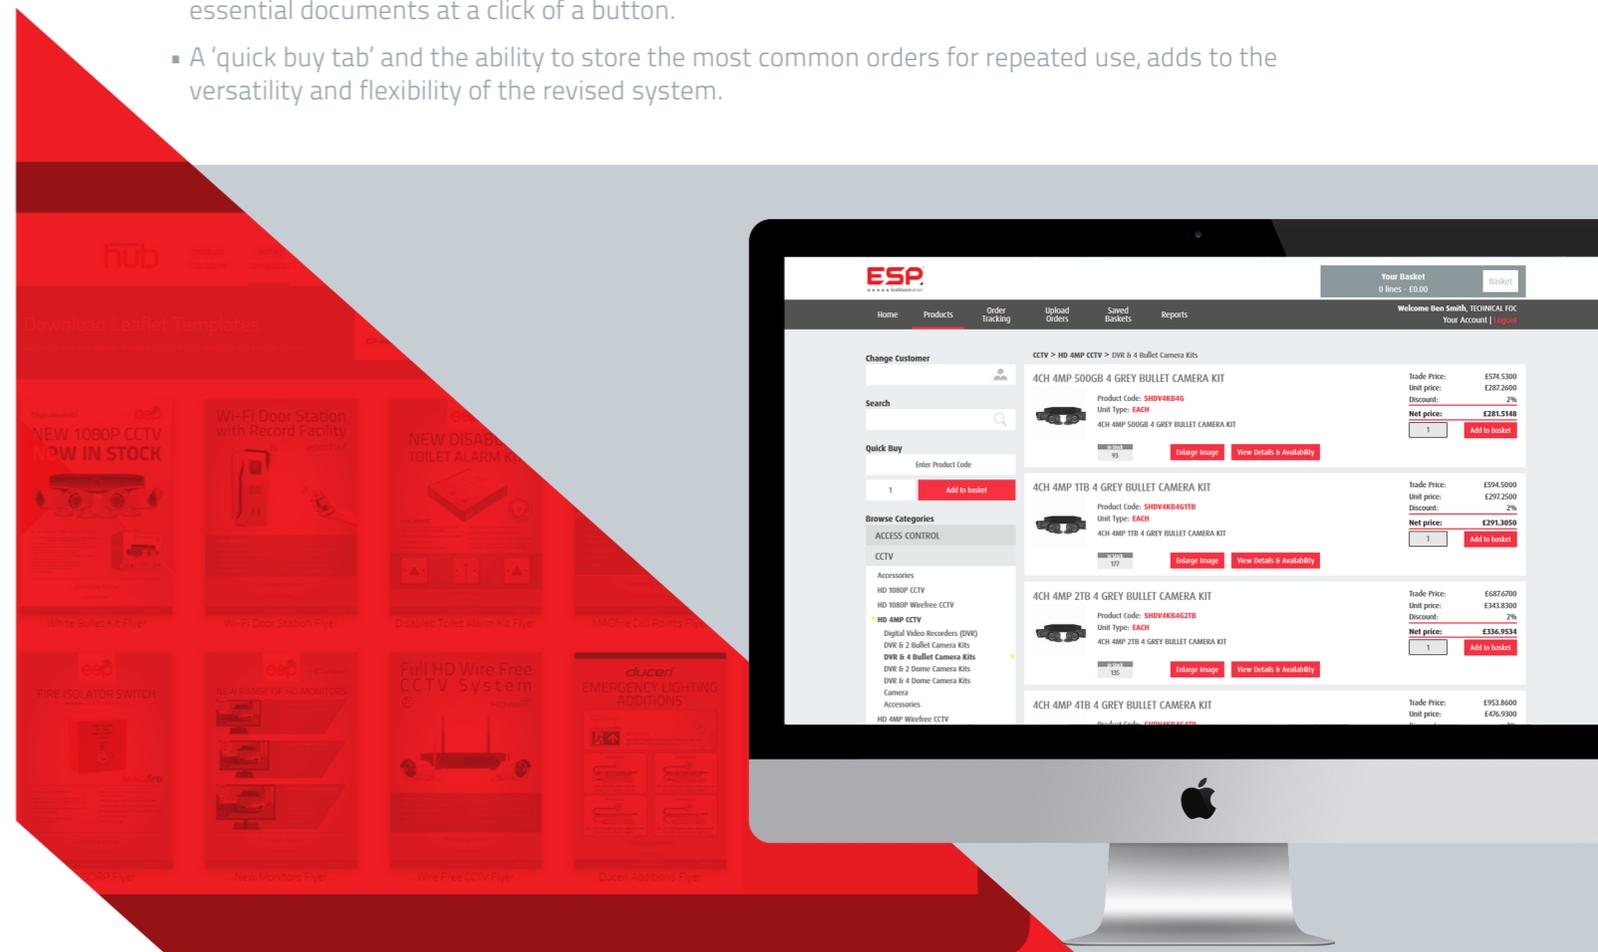

The full product range

The full product range can be found online with specific information about each product and access to the latest catalogue.

Online Ordering | espukonline.com

The updated site now incorporates a number of improved features that allow users to access new information directly and more easily:

- Ordering 24 hours a day 7 days a week with the ability to check current stock levels as required, meaning you are not restricted to ordering during normal office hours.
- Access to on-line catalogues will keep you fully updated with the complete product range and provide information on new products as and when they become available.
- The order tracking service keeps you up to date with the progress of your shipment.
- Managing your administration paper work is now even easier with instant access to reports and essential documents at a click of a button.
- A 'quick buy tab' and the ability to store the most common orders for repeated use, adds to the versatility and flexibility of the revised system.

Scolmore
INTERNATIONAL

Formed in 1989 Scolmore® International Ltd have become a significant force in the electrical accessory market. Scolmore® are proud to be a British based, family-run business, with an excellent track record of listening to what their customers need and providing the right solution every time.

Based in the Midlands at the purpose built 150,000sq ft Head Office and Distribution Centre, they are ideally located to design, develop, manufacture and distribute the ever-expanding product range throughout the UK.

Through their own brand of Click® electrical and lighting products, they are committed to providing a comprehensive range of reliable, high quality and competitively priced products to their customers, whilst also offering a bespoke design and manufacture service to ensure they provide exactly the right solution and product for any installation or project. They're proud to say their customers can trust Click® to get the job done!

Their New Product Development Team are constantly tracking market trends, building regulations and approval standards so they continue to increase their product range to meet the ever-changing needs of their customers.

UNICRIMP

Unicrimp® is the latest new business to emerge from the successful Scolmore® Group of companies. Its formation brings to the electrical contracting industry a comprehensive range of cable accessory products.

Launched under the Qcrimp® brand name and available exclusively through the electrical wholesale trade, the product offering comprises an extensive range of cable management consumables.

All products within the Qcrimp® range are manufactured under stringent quality control systems and are fully compliant with the very latest industry regulations. The range includes cable ties, crimp terminals, PVC tape, copper tube terminals, cable clips, and brass and nylon glands – providing everything required to harness cable between the consumer unit and the end accessory.

Aligned with the core values of the Scolmore® group of companies, Unicrimp® will offer the same levels of outstanding customer service, high quality products and commitment to new product development.

Located close to the Group Headquarters in the Midlands, the new Unicrimp® distribution centre is ideally located to supply to all areas of the UK.

Click
Litehouse

Click® Litehouse is a joint venture operation between Litehouse Accessories Ltd and Scolmore® International Ltd.

Click® Litehouse supplies a comprehensive range of domestic and semi commercial light fittings to the Electrical Wholesale market within Southern Ireland. We work in proud partnership with Scolmore® International and supply a complete range of the market leading "Click" family of wiring accessories.

The Click® Litehouse range of Wiring accessories and Lighting products are supplied exclusively via the electrical wholesale trade and a network of approved stockists nationwide. All products are stored in our modern distribution facility based in Dublin.

We strive to uphold our reputation for excellent service, high quality products and competitive pricing.

Scolmore
DUBAI

Following six years of successful trading in the Middle East, Scolmore Group opened a head office and warehouse facility in Dubai. Scolmore International Electrical Trading (Scolmore Dubai) is located in the heart of Dubai in the Business Bay area.

The warehouse facility of Scolmore Dubai, operating as Scolmore International Middle East Free Zone Establishment (FZE) is located about 10 miles outside of Dubai in the Free Zone area. From this prime location, Scolmore Dubai can stock and distribute its comprehensive range of products more quickly to its customers, which include major distributors, construction clients, hotels and smaller end users.

In addition to products from across Scolmore's range of wiring accessories, a range manufactured at the Sangamo factory in Scotland has been designed specifically for the Middle East market. The Click® Seera range is a comprehensive collection of wiring accessories manufactured from Polycarbonate.

Scolmore® Dubai also supplies products from across Scolmore's extensive lighting range, including all the Inceptor® integrated downlights, as well as emergency lighting solutions from group company, ESP®.
