

IP67 Green Resettable Callpoint

The EVEBGEXT2 is an all-weather surface mounted resettable manual callpoint. The callpoint mimics a breakglass callpoint, but offering the user the benefits and safety advantages of a glass-free resettable operating element. Specially designed for external installations, the callpoint is suitable for environments up to IP67.

Once activated, a warning flag drops into view, allowing for easy identification that the callpoint has been activated.

Current Rating	Material	Electrical Contact Material	Operating Temperature	Max. terminal conductor size
6 Amps 250V AC	Polycarbonate	Silver Plated Brass	20°C to +65°C	0.5mm to 2.5mm
