IP PTZ Camera Quick Start Guide

The latest product manual and software is available online: https://www.espuk.com/technical_support/

www.espuk.com

Connection

Typically the IP Camera (IPC) will either be connected to an NVR or connected directly to a network via a router.

If the IPC is connected to an NVR, the IPC will need a temporary connection to a PC/Laptop to match the NVR's network segment details.

If the IPC is connected directly to a network there is a setup process required to match the network segment detials.

The quick start guide will assist, and the full manual will provide more support if required.

Example Connections

Router Rear • Ð CALITION A **—** 6 ٢ 23 ന്നന്ന് IPC with Router Internet V Router Router

IPC with NVR

Network Connection

After applying power and connecting the IPC to a PC/ Laptop;

Load the supplied 'IP WIZARD' software onto a PC/ Laptop.

Launch the IP WIZARD software, and select 'Search', if the network's existing details match the IPC's default details the device will be recognised.

The default IP address of the IPC is : 192.168.1.168

The default Subnet Mask of the IPC is : 255.255.255.0

1. Click on the IP address in the search bar to access the IPC.

number	Device type	IP address	Subnet mask	gateway	Video port	Http port	RTSP port	MAC Address	Software version
0	IPC	192.168.1.168	255.255.255.0	192.168.1.1	90	80	554	00-2A-2A-3B-1A-2A	1.4.10.0
AAC Address: 00-2A-2A-3B-1A-2A 2 Verification Code:		Equipment net Device IP:	work information 10.10.25.200		Equipment port informati Video port: 90		in	search	
-		Get	Gateway:	10.10.25.1		rtsp port:	554		
			Subnet mask:	255.255.0.0		http port:	80		

2. If required, the IPC's network information can be modified via the IP Wizard to match the intended network segment details.

For example; to use with an ESP NVR, view the NVR's internal interface menu and apply matching segment details:

Setup Channel	Record Alarm Network Device System		×
General	General PPoE Port Configuration		
+ DDNS			
⊕ Email			
♦ FTP	IP Address 172.018.001.100	IP Address 010.010.025.100	
	Subnet Mask 255.255.000.000	Subnet Mask 255.255.000.000	
	Gateway 172.018.000.001		
	DNS1 223.004.004.004		
	DNS2 008.008.008		
		Defau	uit Apply

If the IP Wizard software cannot find the IPC;

On the PC/Laptop, access 'Network Connections', then 'Properties' to access the following menus;

Connect using:	Internet Protocol Version & (TCD/ID.d) Propaging	X)
Realtek PCIe GBE Family Controller	General	Advanced TCP/IP Settings
Cert Transmission correl frequency Cert Cert	Vou cin qut P settings assigned automatically if your network support the capabity. Otherwise, you need to ask your network administrator for the aground B settings. 2. Entor the following details Obtain an IP address: Budderss interaction Budderss interaction Bud	P Setting: DK: WHE P addresse Subnet mark 192.158.177 255.255.05.0 4. Add the Add Edt Remove TCP/IP address Default gateways: P address IP address 192.168.4.77 Subnet mark: 192.255.255.0

After the details have been applied and saved launch the Wizard IP software and 'Search'.

If the search is unsuccessful, review the full installation manual for the product or contact the IT administrator for further support.

Tip; Other network connections on the PC/Laptop may need to be temporarily disabled to complete IPC setup.

Internet Explorer Browser Access

Once the Device Search finds the IPC, the IP address link will open Internet Explorer.

The default user name is admin, the default password is admin;

	- 10	22.0
User name Password Remember my credentials		
	ок	Cancel

Run and Allow the latest plugin;

In the browser add the IPC's IP address in the Compatibility View menu:

Disclaimer
