

Powersaver PSB Boost Runback Timer

Benefits

The Powersaver Boost is a simple to use, multi application time switch. Although primarily used for the control of water heating, the PSB can also be used for a multitude of applications including the control of panel heaters, security lighting or combi boilers.

Electronic Boost controller with a single button operation, offering three user-selectable boost periods of 1/2 hour, 1 hour or 2 hours. An indicator light on the product shows the remaining time.

One of the main benefits of the Powersaver Boost product is its standard size. This is common to all models, which fit directly onto a single gang patress box. This allows installation or upgrading from one model to another, quick and simple. The Powersaver family saves on fuel expenditure and energy wastage by automatically switching off when the user may forget.

Features

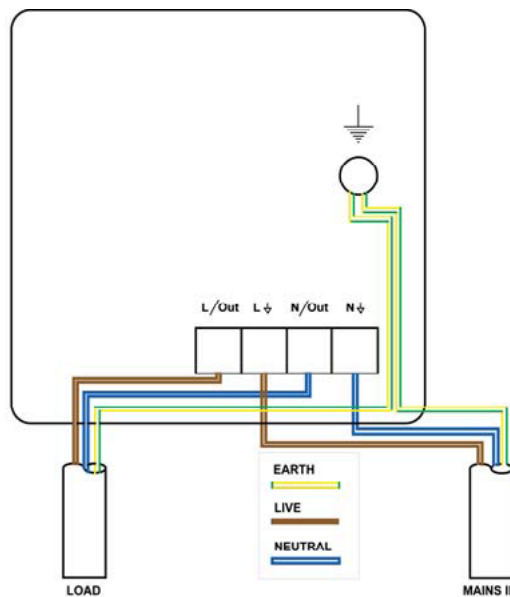

- Ideal for applications that need short term operating times
- Switches appliance off automatically after boost period
- 30 mins, 1 hour and 2 hour boost periods
- Fits directly onto a single gang patress box

Technical Data

Contact Rating:	16A Resistive 240V a.c.
Supply:	230V 50/60 Hz a.c.
Fixing:	Single Patress - Surface and Flush Mounting
Resolution of Programs:	N/A
Power Consumption:	10VA Maximum
Live Parts Protection:	This unit is totally protected by the enclosure
Dirt and Moisture Protection:	IP00
Shock Protection:	Class 1 (this unit must be connected to earth)
Case Material:	Polycarbonate
Type of Action Type:	1B
Temperature Rating:	T35
Operation Temperature:	0°C to 35°C
Memory Reserve:	none
Display:	none
Program Settings:	none
Boost Settings:	User selectable - 1/2, 1 or 2 hours
Control Pollution Category:	Normal
